

Advanced Module

INTRA ORALS

Saturday 15 September 2018

Venue: Mercure Sydney, 818-820 George Street, SYDNEY

Time : 12.30 pm - 6.00 pm

Presented by : Dr Darren Little

In this afternoon SOT advanced module we will leap straight into the Cranials associated with the Category One, which is the Intra-oral cranial adjusting.

Intra-oral corrective protocols will often succeed when extra-oral corrections are not making the desired changes.

This will be predominately a practical session studying the indicators, visual and static analysis, the hand holds and the vectors of correction.

***** For the first time in Australia learn the contacts to complete these adjustments without an assistant. Usually taught as four handed with an assistant, these modifications make the adjustments easier to apply.**

A prior knowledge of the categories and cranial non-specifics will be necessary as the session will move beyond this foundation.

Take your S.O.T to the next level by learning these new skills or refine your mastered skills.

SOT..... An Integral Part of EVERY Chiropractic Practice!

5 Formal Learning Hours
