

S.O.T Advanced Module TMJ - Temporomandibular joint

Saturday 24 August 2019

Venue: Mercure Treasury Gardens—MELBOURNE

Time : 12.30 pm - 6.00 pm

5 Formal Learning Hours

Presented by : Dr Brett Houlden

The TMJ is the major generator of sutural stress to the cranium, and can reflexly disturb the weight bearing sacroiliac joint affecting posture, and normal function.

The S.O.T TMJ techniques taught, address the whole joint complex and include adjustments of the mandible, ligamentous, muscular and articular disc issues.

In this afternoon SOT advanced module you will learn the physiology of the TMJ joint and gain the ability to properly assess temporomandibular disorder.

Learn how to collaborate with your local dentist to improve symptoms such as head posture, bruxism, headaches and TMJ range of motion.

Take your S.O.T to the next level by learning these new skills or refine your mastered skills.

S.O.T An Integral Part of EVERY Chiropractic Practice!
