REGISTER TODAY FOR YOUR NEXT COURSE IN:

1

CATEGORIES: IS THE BASIS OF S.O.T.

Learn how to identify and correct Dural-meningeal, Sacro-iliac and neural aberrancy from spinal dysfunction. Utilising blocks developed by Dr DeJarnette, you will learn to correct distortions patterns which influence dural and weight bearing structures, CSF imbalances and subluxations patterns throughout the spine.

14 FLA Hrs

2

C.M.R.T.: Chiropractic Manipulative Reflex Technique

This highly effective and reliable system of analysis and treatment addresses Autonomic nervous system dysfunction, aberrant visceros-somatic and somato-visceral reflexes, CSF imbalances, compromising the function of the nervous system. These practical tools and techniques allows the Chiropractor to address organ/gland imbalances affecting the central integrated state of the spine, joints and muscles.

12 FLA Hrs

3

CRANIAL:

Continue your journey of discovery into the realms of craniotherapy. Explore the functional relationships of the cranial membranes, their influence on the CSF flow and CNS function and learn connections to affect these areas. Techniques here include cranial range of motion, cranial non-specifics, and some paediatric care.

10.5 FLA Hrs

+

EXTRA
Brisbane
Only

ADVANCED MODULE - CRANIAL SUTURES:

The Sutural system of the cranium is closely linked to our Category II person. Learn how to approach the cranial system within Category II, and how to release and realign all of the major sutural areas of the cranium where indicated. Also covered is releasing TMJ stress. This is one of the most powerful cranial techniques, and is especially useful to help resolve a recurrent Category II. Take your S.O.T to the next level by learning these new skills or refine your mastered skills.

PRE REQUISITE - Delegates must of completed SOTO A Basic Categories and Cranial Session, prior to attending this advanced module.

5 FLA Hrs
